

EDM provides automatic threading

Mitsubishi's FA20VS provides automatic threading capabilities of wire sizes .006 in.-.014 in. fully utilizing the machines high-speed roughing as well as fine finishing abilities.

The V500 power supply provides the proper combination of voltage and peak current to do an excellent job of machining PCD and CBN materials. The V500 combined with Power Master (PM4) also excels in poor flushing type work, providing 20% faster machining as compared to the FA-S Series.
